Kawasaki Racing Parts and all other items contained in this catalog are subject to the following conditions:

- These items are intended for closed-course competition only.
- Alteration of emissions-related components can constitute violation of federal and/or state laws. Substantial fines and penalties can result if used for other than closed-course competition use.
- Use of unauthorized components and/or use of a vehicle in competition can affect a vehicle's warranty coverage.
- Kawasaki Racing Parts or other items in this catalog are not covered by any warranty and are not returnable.
- Quantities may be limited and replacement parts may not be available.

Important Notice

- Kawasaki cautions you that whenever the power output of a vehicle is increased, reliability and durability may decrease. Therefore, proper and perhaps more frequent maintenance and repair work becomes especially important. The Kawasaki Service Manual contains information that will enable you to perform essential maintenance and repairs. This manual can be obtained from any authorized Kawasaki dealer or online at Kawasaki.com.

- Installation of race parts requires mechanical knowledge, proper tools and, in some cases, will require re-tuning of engine and suspension components. For best results, an experienced tuner should make racing modifications. You may wish to take your vehicle to an authorized Kawasaki dealer to have race parts installed on your vehicle. There will be a charge for installation.

- Prices, product and specifications are subject to change without notice or liability. Availability is subject to production, stocking and demand. The purchaser accepts all responsibility concerning installation of race parts, including quality, performance, cost or service and/or necessary repairs.

Important Notice

• Kawasaki cautions you that whenever the power output of a motorcycle or ATV is increased, reliability and durability may decrease. Therefore, proper and perhaps more frequent maintenance and repair work becomes especially important. The Kawasaki Service Manual contains information that will enable you to perform essential maintenance and repairs. This manual can be obtained from any authorized Kawasaki dealer or online at Kawasaki.com.

• Installation of race parts requires mechanical knowledge, proper tools and, in some cases, will require re-tuning of engine and suspension components. For best results, an experienced tuner should make racing modifications. You may wish to take your vehicle to an authorized Kawasaki dealer to have race parts installed on your motorcycle or ATV. There will be a charge for installation.

• Prices, product and specifications are subject to change without notice or liability. Availability is subject to production, stocking and demand. The purchaser accepts all responsibility concerning installation of race parts, including quality, performance, cost or service and/or necessary repairs.

1 Dunlop D756RR

Reinforced racing carcass construction allows lower air pressures for a larger tire footprint • Special compound provides for less wheel spin when launching off concrete starting pads • Increased traction and less wheel spin under acceleration • Improved bump adsorption and less kickback over bumps • Quicker starts and more holeshots

K41009-111	D756RR 110/80-19	$124.72

2 Dunlop D756

Offers outstanding performance on intermediate-to-soft terrain, yet its versatile design gives it a wide range of ability on harder surfaces • Shoulder knobs feature recessed biting edges for enhanced traction in ruts and flat corners • Rear tread pattern provides maximum straight-line grip for excellent starts and improved braking • Reduced tire weight results in less unsprung weight • The exact same technology we use to make full-size tires goes right into every minibike D756

***Stock 86.3mm pull rods on the 2002 KX65 can be exchanged for optional 85.3mm or 87.3mm to raise or lower the seat height by 4.5mm each.*
*****Refer to the 2007 KX65 owners's manual for position information.*

FOOTNOTES - Rebound and compression adjustments are the number of clicks out from full hard (all the way in). Front fork oil level in millimeters (mm) is a measured distance or in cc's for a measured volume. Rear shock sag level is measured in millimeters (mm). All optional spring part numbers can be found at your local Kawasaki dealership.
SPECIAL NOTE - Team Green recommends that any suspension sag measurements be done when shock is cold. Always test new setting before racing.
N/mm = Newtons / millimeter - Kgf = kilograms force
Conversion Formula for each method of measurement: N/mm Spring Rate x 0.102 = Kgf/mm Spring Rate and Kgf/mm Spring Rate x 9.807 = N/mm Spring Rate

CAUTION: Team Green specifications are obtained using 92 Octane pump fuel mixed at a 32:1 mix ratio. Your results will vary with the use of different gasolines, oils, temperatures, altitudes or mix ratios. Team Green does not recommend the use of low octane pump gas, aviation fuels or octane boosters. Use of these products may cause engine damage or failure. Recommended for sea level to 3,000 feet above sea level.

Important Notice

• Kawasaki cautions you that whenever the power output of a motorcycle or ATV is increased, reliability and durability may decrease. Therefore, proper and perhaps more frequent maintenance and repair work becomes especially important. The Kawasaki Service Manual contains information that will enable you to perform essential maintenance and repairs. This manual can be obtained from any authorized Kawasaki dealer or online at Kawasaki.com.

• Installation of race parts requires mechanical knowledge, proper tools and, in some cases, will require re-tuning of engine and suspension components. For best results, an experienced tuner should make racing modifications. You may wish to take your vehicle to an authorized Kawasaki dealer to have race parts installed on your motorcycle or ATV. There will be a charge for installation.

• Prices, product and specifications are subject to change without notice or liability. Availability is subject to production, stocking and demand. The purchaser accepts all responsibility concerning installation of race parts, including quality, performance, cost or service and/or necessary repairs.

Dragonfire Racing

Kawasaki Team Green-sponsored Dragonfire Racing will be lighting up the Score International Off-Road Series in 2009. In cooperation with Dragonfire Racing, Kawasaki Team Green is proud to offer many of the same products used by Funco Team Green! Serious drivers demand serious results; insist on official Kawasaki Team Green Performance products for the ultimate in quality and performance.

Important Notice

• Warning: ATVs can be hazardous to operate. For your safety: Always wear a helmet, eye protection and protective clothing. Never carry a passenger. Never ride under the influence of drugs or alcohol. Never ride on public roads or pavement. Avoid excessive speeds and stunt driving. Be extra careful on difficult terrain. Kawasaki ATVs with engines of 90cc and above are recommended for use only by persons 16 years of age or older. Kawasaki always recommends that all ATV riders take a training course. For more information see your dealer, or call the ATV Safety Institute at 1-800-887-2887.

• Kawasaki cautions you that whenever the power output of a motorcycle or ATV is increased, reliability and durability may decrease. Therefore, proper and perhaps more frequent maintenance and repair work becomes especially important. The Kawasaki Service Manual contains information that will enable you to perform essential maintenance and repairs. This manual can be obtained from any authorized Kawasaki dealer or online at Kawasaki.com.

• Installation of race parts requires mechanical knowledge, proper tools and, in some cases, will require re-tuning of engine and suspension components. For best results, an experienced tuner should make racing modifications. You may wish to take your vehicle to an authorized Kawasaki dealer to have race parts installed on your motorcycle or ATV. There will be a charge for installation.

• Prices, product and specifications are subject to change without notice or liability. Availability is subject to production, stocking and demand. The purchaser accepts all responsibility concerning installation of race parts, including quality, performance, cost or service and/or necessary repairs.

Holeshot SX

Holeshot SX: Front: 20x6-10; Rear: 18x10-8 • Specifically designed for intermediate to hard-packed MX tracks • Uses more tightly spaced knobs to increase tire contact patch • Knobs have been laterally siped (thinly cut), resulting in twice the number of biting edges

Holeshot XCT

Holeshot XCT: Front: 23x7-10 (4-ply); Rear: 22x11-8, 22x11-9, 22x11-10 (6-ply) Our tallest high-performance trail riding and racing knobby aggressive tread pattern for even more impressive cornering ability • Perfect for rough, rocky desert terrain • Extremely puncture resistant thanks to extra heavy-duty sidewall construction • Winner of three straight SCORE Baja 1000 events • In 2005 Team Alba Pro rode to the win without a single flat!

Holeshot GNCC

Holeshot GNCC: Front: 21x7-10, 22x7-10 (6-ply); Rear: 20x10-9, 21x11-9 (6-ply) • Ideal for today's 4-stroke sport machines! 6-ply tough yet light in weight • 2 pounds lighter than Holeshot XC model, 2 pounds lighter than the Razr • Lower in profile, narrower and lighter than the XC/XCT models • Special angled shoulder knob design provides increased side bite for faster, more controllable cornering • Bright hot patch logo on sidewall

Holeshot MXR6

Holeshot MXR6: MXR6 Front: 19x6-10, 20x6-10 (2-ply); Rear: 18x10-8, 18x10-9 (2-ply) • An ideal choice for loose track surfaces, with wider-spaced split knobs for better bite and clean-out • Rear MXR6 uses a new reinforced carcass, minimizes stretching while maintaining a flat profile, providing consistent feel and performance • New carcass allows lower tire pressures, enhancing control as well as ride comfort. Front MXR6 features a new, longer-wearing tread compound-more motos per tire!
